

MediAid Clinical Laboratory Report

Patient Name: Arjun Rao
Age/Gender: 45 / Male
Date: June 12, 2026

Test Results:

1. Serum Creatinine: 2.4 mg/dL (High)
2. Blood Urea Nitrogen (BUN): 42 mg/dL (High)
3. Estimated GFR (eGFR): 38 mL/min/1.73m² (Reduced Kidney Function)
4. Urine Albumin: Positive (Proteinuria Detected)
5. Potassium: 5.4 mmol/L (Slightly Elevated)

Clinical Impression:

Laboratory findings suggest impaired kidney function consistent with chronic kidney disease (CKD) requiring medical evaluation and follow-up.

Prescriptions/Medications:

- Losartan 50 mg - 1 tablet once daily
- Furosemide 40 mg - 1 tablet every morning
- Calcium Acetate 667 mg - 1 capsule three times daily with meals
- Renal Multivitamin - 1 tablet daily

Note: This is a sample/generated report and not a real medical diagnosis.
